DETAILED ACTION

Drawings

1. The drawings were received on November 5, 2004. These drawings are approved

Response to Amendment

Amendment filed November 5, 2004 has been entered.

Claims 14 and 42 have been cancelled.

Currently claims 1-13, 15-41 and 43-46 are pending.

Allowable Subject Matter

Claims 1-3 were previously allowed.

In view of applicant's amendment filed November 5, 2004 and overcoming the rejection of 35 U.S.C. 112 dated August 17, 2004, now claims 4-13, 15-41 and 43-46 are in condition for allowance.

REASON FOR ALLOWANCE

The following is a statement of reasons for the indication of allowable subject matter: prior art fails to teach or fairly suggest an imaging method including the steps: Combining the response signals relating to the two successive pulses by a weight function which, by comparing corresponding samples of the two echo signals, assumes values in a range between a maximum value and a minimum value depending on the mutual correlation measure between said corresponding samples of the two signals; combining the weight function thereby obtained with the combination of the two echo

signals and transforming the resulting signal into image data in combination with other elements of independent claim 1.

Although, Song (US 6,618,607) disclose MRI imaging using a single excitation comprising; generating a single excitation pulse and exciting a target region of a subject with the generated excitation pulse and exiting a target region of a subject with the generated excitation pulse, obtaining a first compensated image, and second compensated image, combining first and second image. But Song fails to teach or fairly suggest the invention as specified in claim 1.

Claims 1-13, 15-41 and 43-46 are allowed (renumbered as claims 1-44).
